

The sprint retrospective

A photograph of a business meeting. In the foreground, a person's hands are visible, holding a pen and pointing at a document with various charts and graphs. The document includes a pie chart, a bar chart, and a line graph. In the background, other people are seated around a table, with their hands resting on the table or holding documents. A glass of water is also visible on the table. The overall scene is a professional business environment.

The sprint retrospective is usually the very last thing that's done in a sprint

- **There will always be room for improvement**
- **The purpose of the sprint retro is therefore to give the team members a chance to highlight the improvements, which they can do on the functionality**

- **What worked**
- **What did not work**
- **What could be improved**

- **Brainstorm things they should start doing to improve working practices (and therefore the product)**
- **Discuss those they should stop doing**
- **And lastly those they can continue doing**

- **By the time the end user has the product, it is the best it can be because the team improved working practices**
