

The sprint planning meeting

● **This is the first meeting
of the sprint**

- **Number of items they can commit to**
- **List of the tasks and stories they aim to deliver during that sprint**

A group of four business professionals (three men and one woman) are seated around a glass table in a meeting room. They are engaged in a discussion, with one man gesturing with his hand. The room has a brick wall and a window with blinds in the background.

**Feature
(User Story)**

**Ideally the ones on the
top most part of the
product backlog**

- **The product owner talks through the top priority items in the backlog**
- **The team breaks each item into tasks and accepts it into the sprint**

- **This process continues until the team can no longer take on any more tasks**

- **The product owner gets no say about who does what as this is the choice of the team**
- **Neither does s/he get a say in the number of items to be worked on in the sprint or choice thereof**

- **All the features developed in the sprints will, in the end, be integrated into the developing product or system; already coded and tested**
