

## How to Get Certified at Scrum.org in 3 easy steps

### Pre-requisites

- complete the **course** and all the questions
- read the **scrum guide** (attached in earlier lecture)
- read my **certification tips** (you can download the PDFs and recap)

### 3 Steps

1. Do the product owner open assessment here:

<https://www.scrum.org/open-assessments/product-owner-open>

I recommend until you get 100% 3 times. This is just a guideline. You need to feel confident : )

You can also do the Scrum Open Assessment here (though this will take in depth study of the scrum guide):

<https://www.scrum.org/open-assessments/scrum-open>

2. Until you pass - Read the Scrum Guide and suggested reading:

Sit this course again till you pass the open assessment. The scrum guide is also attached to this course

and available at: <http://www.scrumguides.org/>

The suggested reading from scrum.org is here : <https://www.scrum.org/resources/suggested-reading-professional-scrum-product-owner>

3. When you pass and feel confident - Take the PSPO I Certification at:

<https://www.scrum.org/professional-scrum-product-owner-i-certification>

The PSPO 1 is an online exam. Nothing is necessary except access to a computer and browser. You can take the test at home or wherever you have access.

Good luck!

Paul.
