# Certification Tips

Increment

Key Points To Remember

Increment

- An increment is the result of the Developers' work in the sprint (including previous increments)

- An Increment is a concrete stepping stone toward the Product Goal

- The sum of the Increments is presented at the Sprint Review

- An Increment may be delivered to stakeholders prior to the end of the Sprint

- Definition of Done describes of the state of the Increment when it meets the quality measures required for the product

- Definition of Done creates transparency and shared understanding of what work was completed as part of the Increment

- If the Definition of Done for an increment is part of the standards of the organization, all Scrum Teams must follow it as a minimum

- If it is not an organizational standard, the Scrum Team must create a Definition of Done appropriate for the product

- If there are multiple Scrum Teams working together on a product, they must mutually define and comply with the same Definition of Done
