# The review meetings

The scrum team proceeds to perform a sprint review

In order to give feedback with the potential to influence the next sprint

The team might see it fit to make changes in the freshly delivered functionality to improve quality

Feature (User Story) ✓

- The team might see it fit to make changes in the freshly delivered functionality to improve quality

- Change or addition to the product backlog

- If a feature is approved in the review, it is said to be ready to be shipped
